

## Farmers Quad bike Protection

### Prolan Medium Grade

SIZES : 1 litre, 4 litre and 20 litre.

### PROLAN LANOLIN LUBRICANTS

Prolan is an all-purpose natural lanolin lubricant and corrosion inhibitor. Its unique properties surpass other petrochemical products in performance, reliability, longevity, protection, safety and asset maintenance. Medium grade liquid lanolin will preserve, lubricate, and protect your farm assets long term.

### RECOMMENDED USES

- Excellent rust protectant underneath quad bike or motorbike frames that are used on dairy farms.
- Treatment for under 4WD's that are used on beaches or farms to prevent chassis corrosion.
- Spray onto fibre-glass or plastic surfaces and rub into the surface to rejuvenate the color.
- Excellent rust protection for storage of parts to stop rust.
- Spray around electrical connections to prevent moisture penetration and prevent corrosion and electrolysis.
- Non-conductive to 70Kv won't break down rubber and wiring.
- Moisture barrier.

### FEATURES

- Long lasting protection saving time on multiple reapplication.
- Generally lasts 9-12months.
- Bike service life can be doubled.
- Won't break down rubber and wiring.
- Stops corrosion by preventing air and moisture attack.
- Most surfaces can be water-blasted, Prolan will not be affected.
- Safe to use, environmentally friendly and biodegradable.

### APPLICATION

- Shake can, apply using a trigger pack sprayer, garden sprayer or airless spray gun.
- If left overnight or longer it will attract less dust and dirt leaving a cleaner finish.

## Farm Maintenance Protection

### Prolan Grease Anti Seize

SIZES : 500ml, 4 litre and 20 litre

### PROLAN LANOLIN LUBRICANTS

Prolan is an all-purpose natural lanolin lubricant and corrosion inhibitor. Its unique properties surpass other petrochemical products in performance, reliability, longevity, protection, safety and asset maintenance. Medium grade liquid lanolin will preserve, lubricate, and protect your farm assets long term.

### RECOMMENDED USES

- Extremely good anti-seize to use in assembly/disassembly of components.
- Extremely good anti seize for prevention of galling on stainless steel threads.
- Added electrolysis barrier between dissimilar metals.
- Smear around all electrical connections to prevent moisture corrosion.
- Assembly of components that have to be removed or opened up for regular maintenance.
- Excellent in slow moving pins and bushes as water is unable to wash it out.

### FEATURES

- Long lasting protection saving time on multiple reapplication
- Will stay in the joint or threads for long periods and allow easy removal of components anytime in the future.
- Can't be washed out of the joint by high pressure water blasting or salt water.
- Won't break down rubber and wiring.
- Seals off the surfaces from air and moisture and prevents corrosion.
- Safe to use, environmentally friendly and biodegradable.

### APPLICATION

- Apply to thread or flat surface using finger, rag or by dipping the component into the tub.
