Is your Quadbike like this?

Rusted out within 4 years

Treated with Prolan –No Rust

RECOMMENDED USES

- General workshop lubricant.
- Quadbike vehicle chassis - on beach and farm.
- Frees up frozen components, padlocks, hinges, fasteners, door handles & tools.
- Rust protection on stored equipment, tools.
- Electrical wiring and connections- non-conductive up to 70KV.
- Internal motor component preservation – safe inside boat motors.
- Lubricant for drilling, cutting, machining and pressing.
- Corrosion protection for exported machinery.
- Alternative anti-spatter or wire rope lubricant.
- Rust protection on newly machined components.

FEATURES & BENEFITS

- Long lasting protection saving time on multiple reapplication
- Resists acids & alkalis.
- Won't break down rubbers & wiring.
- Prevents oxygen and moisture from contacting metal surfaces.
- Easy to apply. Versatile - multiple uses.
- Environmentally friendly and biodegradable.
- Food grade.

APPLICATION

Prolan is easy and safe to apply using an aerosol, trigger pack sprayer, garden sprayer or airgun. On areas that need to be clean to touch - spray and wipe off excess with a rag as this will leave a thin waxy film.

For rust protection where possible remove any dirt, scale or other surface coating. Apply Prolan and leave overnight or longer if possible.

Applications can be recoated in 9-12 mth intervals depending on the situation. Spray onto fibreglass or plastic surfaces and rub with a rag to rejuvenate.

N.B Cold waterblasting will not remove Prolan coatings.

Prolan cleaner is available to take off existing coatings.
