

Get the best results from a high performance lanolin lubricant.

- + Long lasting protection saving time on multiple reapplications
- + Resists acids and alkali
- + Resists being washed off surfaces (after the carrier has evaporated)
- + Excellent protection for parts in storage or transit
- + Safe to handle and apply
- + Penetrates rust to protect metal & alloy surfaces
- + Prevents moisture & oxygen from contacting metal surfaces
- + Lifts rust scale
- + Forms a moisture barrier preventing corrosive agents penetrating the surface
- + Frees up seized parts
- + General workshop lubricant

High performance lanolin lubricant for the engineering industry

The environmentally friendly workshop lubricant for rust protection and anti-seize maintenance.

Prolan is a New Zealand made all-purpose natural lanolin lubricant and corrosion inhibitor.

Prolan's main ingredient, lanolin (natural wool grease), is one of the most versatile natural substances on the planet. Its unique properties surpass other petrochemical products in performance, reliability, longevity, protection, safety and asset maintenance.

Save time, use a high performance reliable product with long lasting results.

Eliminate frequent reapplications, use long lasting lanolin grease and lubricant.

www.prolan.co.nz

Prolan will ensure the long term protection of your investments and assets – including your staff, and is safe on the environment and safe to handle.

+ Prolan Medium Grade Liquid Lanolin is a brilliant general workshop lubricant and substitute cutting oil. It is available in a handy 300gsm aerosol can or 1L, 4L, 20L cans. An environmentally friendly alternative to common petrochemical products.

+ Prolan Heavy Grade Liquid Lanolin comes in 1L, 4L and 20L cans. It is most suitable for use in highly corrosive areas and when applying to moving parts such as chains, rollers, springs, winches or for anti-spatter and wire rope lubricant.

+ Prolan Grease is an excellent anti-seize product and will perform in the harshest of conditions below 45°C. It is available in 0.5L, 1L, 4L, and 20L tubs. For slow moving pins and bushes this product will not be washed out by water or cleaning.

Common uses & applications include:

- + Rust protection on newly machined components
- + Alternative anti-spatter or wire rope lubricant
- + To prevent galling on stainless steel and aluminium threads
- + Anti-seize for flange threads
- + Long term storage of spare parts
- + Rubber grease, no perishing
- + Mig welding nozzle dip
- + Drilling and cutting aid
- + Metal to metal soft seal gaskets
- + Long lasting corrosion protection & anti-seize on all heavy machinery, chains, drive belts, and tools.

The complete range of Prolan products includes light, medium and heavy grade liquid lanolin lubricants, and anti-seize grease.
